Work Completed During Second Quarter 2010

1. Conducted groundwater monitoring activities on April 5 through 8, 2010 at the Site (Figures 1 and 2). The monitoring activities included the collection of groundwater samples from 21 wells and the gauging of two other wells. A summary of groundwater monitoring data is presented in Tables 1 through 3. Analytical results for selected pesticides are presented in Figures 3 through 6. Copies of the chain-of-custody documentation and laboratory reports are presented in Appendix A.
2. Collected soil samples on April 8, 2010 for waste characterization purposes. A composite soil sample (COMP-1) was collected in the area defined by sample location SB-137 (Figure 2). The composite sample was collected from a depth of 1 to 2 feet below ground surface (bgs) and analyzed for TCLP chlorinated pesticides. A summary of TCLP analytical data is presented in Table 4. Copies of the chain-of-custody documentation and laboratory reports are presented in Appendix A.
3. Conducted groundwater monitoring activities on May 4, 2010 at the Site (Figure 2). The monitoring activities included the collection of groundwater samples from six wells and the gauging of two other wells. A summary of groundwater monitoring data is presented in Tables 1 through 3. Analytical results for selected pesticides are presented in Figures 3 through 6. Copies of the chain-of-custody documentation and laboratory reports are presented in Appendix A.
4. Collected soil samples on May 4, 2010 to further delineate the chlordane impacts at sample location SB-137. A total of 14 soil samples were collected from seven borings (137-A through 137-G) at two depth intervals (0 to 2 feet bgs and 2 to 3 feet bgs) at the Chevron property (Figure 2). The samples were analyzed for chlorinated pesticides. Based on the total chlorinated pesticide concentrations, three of the samples were selected for TCLP extraction and analysis for chlorinated pesticides. A summary of soil analytical data is presented in Tables 4 and 5. Copies of the chain-of-custody documentation and laboratory reports are presented in Appendix A.
5. Collected soil samples on June 2, 2010 to further delineate the chlordane impacts at sample location SB-137. A total of 10 soil samples were collected from 10 borings (137-H through 137-Q) at a depth interval of 10 to 30 inches bgs at the Chevron property (Figure 2). These samples were also analyzed for chlorinated pesticides. Based on the total chlorinated pesticide concentrations, two of the samples were selected for TCLP extraction and analysis for chlorinated pesticides. A summary of soil analytical data is presented in Tables 4 and 5. Copies of the chain-of-custody documentation and laboratory reports are presented in Appendix A.
6. Conducted groundwater monitoring activities on June 9, 2010 at the Site (Figure 2). The monitoring activities included the collection of groundwater samples from five wells and the gauging of two other wells. A summary of groundwater monitoring data is presented in Tables 1 through 3. Analytical results for selected pesticides are presented in Figures 3 through 6. Copies of the chain-of-custody documentation and laboratory reports are presented in Appendix A.
7. Performed site maintenance activities including mowing, weeding, and trash removal.

**SITE STATUS UPDATE
CHEVRON ORLANDO SUPERFUND SITE
SEPTEMBER 8, 2010**

Work Completed / To Be Performed During Third Quarter 2010

1. Conducted groundwater monitoring activities on July 6 through 9, 2010 at the Site (Figure 2). The monitoring activities included the collection of groundwater samples from 21 wells and the gauging of two other wells.
2. Collected soil samples on July 27, 2010 for additional waste characterization purposes. A total of two soil samples were collected from two borings (137-R through 137-S) at a depth interval of 10 to 30 inches bgs at the Chevron property (Figure 2). These samples were also analyzed for chlorinated pesticides. Based on the total chlorinated pesticide concentrations, none of the samples were selected for TCLP extraction and analysis for chlorinated pesticides since they did not have the potential to exceed regulatory levels.
3. Conducted groundwater monitoring activities on August 9 and 11, 2010 at the Site (Figure 2). The monitoring activities included the collection of groundwater samples from six wells and the gauging of two other wells.
4. Conducted groundwater monitoring activities on September 1, 2010 at the Site (Figure 2). The monitoring activities included the collection of groundwater samples from six wells and the gauging of two other wells.
5. Submitted *Site Status Update* report for Second Quarter 2010.
6. Continue to assess residual soil impacts along the southern boundary at the Chevron property.
7. Continue to research the ownership and use of the Tropical Plant Warehouse property.
8. As needed, perform site maintenance activities including mowing, weeding, and trash removal.
